## ABOUT ME

---

MCA graduate with hands-on experience in PHP Laravel development, specializing in web application design, database management, and API integration. Currently contributing to a major company project, with a proven track record of working on diverse systems including user management, e-commerce functionality, and role-based access control. Committed to delivering innovative solutions through clean, efficient, and maintainable code.

## EXPERIENCE

---

Aug 2023 – June 2025

**PHP Laravel Developer**

*Kiwisoft Solutions  
LLP, Kerala*

- Working on a live web-based platform for real-time flight and hotel bookings with dynamic pricing.
- Design database schemas and manage database migrations.
- Integrated third-party APIs (Amadeus, Flydubai, Flynas) for real-time booking and data synchronization.
- Contributed to backend development, API handling, and feature enhancements in an Agile environment.

## TECHNICAL SKILLS

---

- Languages & Frameworks: PHP, Laravel, HTML5, CSS3, Bootstrap 5, JavaScript
- Concepts & Tools: OOP, MVC Architecture, REST APIs, Git, Composer
- Database & Hosting: MySQL, AWS (Amazon Web Services)
- Other: Problem Solving, Version Control, Responsive Design

## PROJECTS

---

### TRIP PARTNER

- A social travel planning app allowing users to create and join travel plans.
- Integrated Google Maps API for location tracking and trip visualization.
- Features expense sharing and trip diary functionality with image uploads.

## **LABSOFT**

- A commercial web application for medical labs to manage patient and doctor records.
- Implements unique IDs for patients and tests, ensuring accurate record tracking.
- Stores comprehensive test details, including advising doctor's information.

## **BLOOD BANK**

- A Laravel-based application to manage blood donations and requisitions.
- Donor eligibility checks, dynamic state/district dropdowns via API, and email notifications upon registration.
- Includes donor search and admin oversight for safe operations.

## **CRMS – Chinmaya Recruitment Management System**

- A campus recruitment portal for connecting students and employers.
- Matches candidates based on qualifications and preferences.
- Multi-role access for students, employers, and admins.

## **OYSTERS EVENTS**

- Developed a single-page responsive website for an event management firm.
- Dynamic content management and effective service showcase for better user engagement.
